- Access to transparent and clear real-time data anywhere, anytime

Sustaining your growth

OPERATIONAL EFFICIENCY THANKS TO A HOLISTIC APPROACH TO THE DIGITALIZATION

Connected sites & infrastructures

- Smart meters & sensors

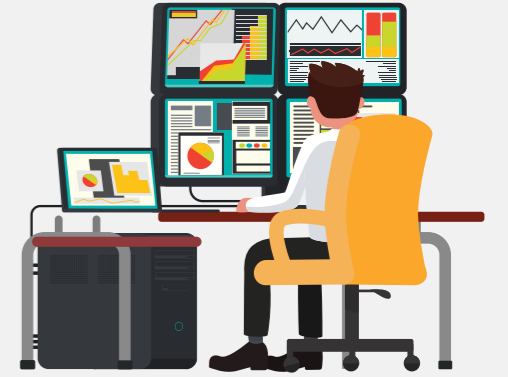

Interactive reporting

- Flexible and customized dashboards
- Different levels of analysis
- Available on Enova by Veolia mobile app

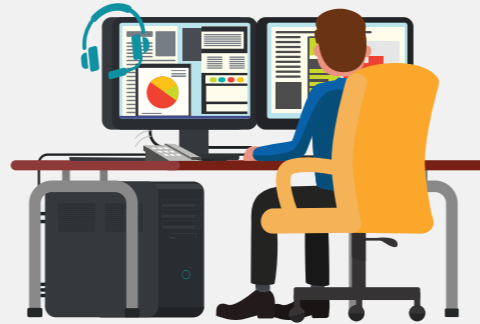

Hubgrade

- Data control & analysis
- Alarm signal in case of malfunction
- Corrective action plan

24/7 Helpdesk

- Customer satisfaction management
- Equipped with PABX system
- Fully integrated with our CAFM system

BENEFITS

- Reduced response time
- Real-time performance management
- Full visibility on results
- Available on the go

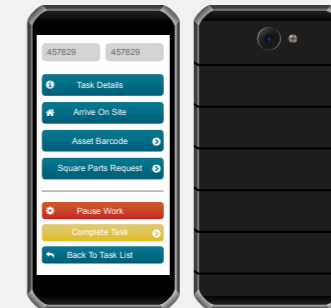

Technical unit

- Communication of intervention plan
- On site maintenance
- Smart waste management via Eswap

PDA mobile devices

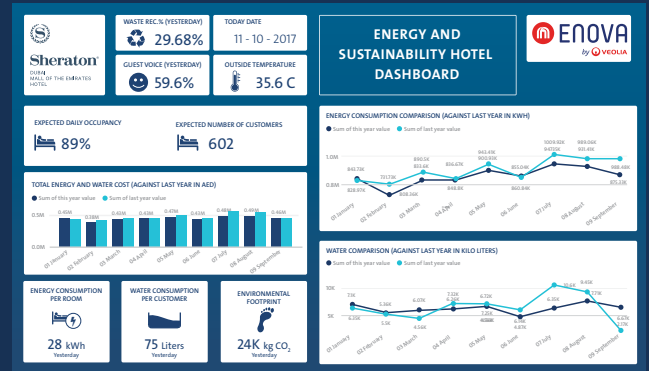

- Monitoring and control of operations
- Two-way visibility on tasks to be executed
- Integrated customer satisfaction form

DASHBOARDS

Enova develops customized dashboards that enable flexible analysis:

- Technical dashboards give access to operational KPIs, enabling technical staff to make immediate decisions to improve performance.
- Facilities dashboards allow facility managers to choose which indicators to follow from a library covering Health & Safety and comfort aspects.
- Data Viz can benchmark the performance of a portfolio of facilities, offering a strategic view and analysis by geography and type.

ESWAP

With Enova Smart Waste App (Eswap), Enova optimizes the recycling rate of waste produced by a facility.

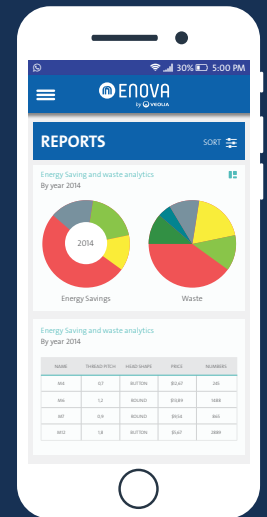

Eswap allows us to check, track and manage waste sorting and recycling in a quick and efficient way to improve the environmental footprint of our clients' facilities and their overall waste management performance.

ENOVA BY VEOLIA MOBILE APP

Available on both Android and iOS, the Enova by Veolia mobile app provides transparent real-time data on financial and operational performance.

Our clients can:

- Consult customized performance reports on the go.
- Raise requests and report breakdowns.
- Receive notifications on progress made.
- Rate the service after task completion.
- Subscribe to new services in just one click.
