

PRESS RELEASE – FOR IMMEDIATE RELEASE

MAF Dalkia Builds On Their Aviation Expertise by Signing Contract with Abu Dhabi Airports Company

The three year deal covers 3 airports and an off-site check-in terminal across Abu Dhabi and Al Ain

Dubai, United Arab Emirates, XX May 2013 – MAF Dalkia further boosts its reputation as a regional leader in providing multi-technical and energy management services, as it secured a contract with aviation giant Abu Dhabi Airports Company PJSC (ADAC) to provide a full range of services across four of their airports in the UAE.

The three year contract will see MAF Dalkia providing a full scope of project management, hard (technical) services, security systems in addition to energy saving strategies for the ADAC's award winning, flagship development; Abu Dhabi International Airport, Al Bateen Executive Airport, Abu Dhabi International Airport City Check-in and Al Ain International Airport. The project enables ADAC to offer a world-class experience to their tens of millions of passengers each year.

“MAF Dalkia are pleased to join forces with ADAC, the leading aviation company in the UAE, to offer our premium range of specialised services across these award winning airports,” said Alexandre Mussallam, CEO of MAF Dalkia. “We look forward to building on their existing success, by offering the highest level of Management and Hard Services, while also instigating Energy Management and Conservations Plans across all sites, bringing an international standard to these world-class developments.”

MAF Dalkia's scope of work for ADAC will include: development, implementation and updates of SOP's and Fit Outs; full technical services covering energy management and conservation, security systems, heating and electrical services and specialised airports operation systems.

The project will see MAF Dalkia implement these services across all four sites. The largest of which is 2012 'Best Airport in the Middle East', Abu Dhabi International Airport (AUH).

The flagship airport is constantly expanding to meet demand, and by 2015 will accommodate 20 million passengers per annum.

Al Bateen Executive Airport, situated 19km west of AUH, is the only dedicated business aviation airport in the Middle East and North Africa region.

Abu Dhabi International Airport City Check-in is 30km from ADIC and provides convenient first and business class services for travellers including off site check-in and baggage drop.

Also included in the contract is Al Ain International Airport which was originally built to serve 1,000 passengers per hour at peak times, but increased demand has seen this double, and the airport now serves nine destinations with seven airline carriers.

Ahmad Al Haddabi, Chief Operations Officer at Abu Dhabi Airports Company, commented: "ADAC welcomes MAF Dalkia as a new partner for the Capital's airports and it is confident that its expertise in managing complex and large-scale developments will further support the company's drive to operate its airports and facilities to the highest of international standards, and provide a unique travel experience.."

This contract further establishes MAF Dalkia's expertise across the aviation sector, enhancing their existing portfolio of work which includes residential, commercial, hospitality, telecommunications, healthcare, education, banking and finance sectors across the United Arab Emirates and Middle East region. Key clients include the Kempinski, Novotel and Ibis hotels, Standard Chartered Bank, du Telecom and Sharjah International Airport.

MAF Dalkia was established in 2002 as a joint venture between Majid Al Futtaim Ventures and Dalkia, a European leader in energy services. It is a recognised leader in energy and multi-technical services in the Middle East.
